DURAFLO®

**DESCRIPTION:** DURAFLO® Gloss is a premium interior enamel formulated with advanced waterborne alkyd technology. It is ideal for interior walls, trim, moulding, cabinets, doors, kitchens, baths, and high traffic areas. DURAFLO Gloss exhibits application and appearance characteristics similar to traditional oil-based paint, but has less odor, dries faster, and allows for water cleanup. It develops a hard, durable finish that has excellent adhesion, hide, block resistance and reduced yellowing. (As with all oil-based finishes, it may yellow due to heat, lack of light, or when the painted surface is exposed to ammonia-containing household cleaners.)

**SURFACE PREPARATION:**
- All surfaces must be cured, clean, dry, and free from dirt, dust, rust, stains, grease, oil, mildew, wax, efflorescence, bond-breakers, and other contaminants. Remove all loose, peeling, or chalky paint by sanding, scraping, or other appropriate methods. Repair all cracks, holes, and other surface imperfections with a suitable patching material. Repaired surfaces should then be sanded smooth and dusted clean. Glossy surfaces should be dulled to provide a roughened surface for good adhesion.

**SPECIAL INSTRUCTIONS**
- CAUTION: Scraping or sanding surfaces of older buildings (especially pre-1978) may release dust containing lead or asbestos. EXPOSURE TO LEAD OR ASBESTOS CAN BE VERY HAZARDOUS TO YOUR HEALTH. Always wear appropriate personal protective equipment during surface preparation, and finish cleanup of any residues by water-washing all surfaces. For more information, see Dunn-Edwards brochure on “Surface Preparation Safety” or call EPA’s National Lead Information Hotline at 1-800-424-LEAD, or visit www.epa.gov/lead or /asbestos, or contact your state or local Health Department.
- This product can neither cause nor prevent or cure the growth of mold, mildew, or other forms of fungus. Excessive moisture and inadequate ventilation are the main conditions that promote their growth. Correct any such conditions before painting.
- Do not apply when the air or surface temperature is below 50°F.
