Elastomeric Wall Coating

ENDURALASTIC® 10

Flexible, long-lasting performance.
ENDURALASTIC® 10

is an ultra-premium specialty, 100% acrylic elastomeric wall coating that provides superior performance and exceptional durability for masonry surfaces. ENDURALASTIC 10 is ideal for residential, multi-family housing, schools, hospitals and commercial projects.

Why ENDURALASTIC® 10 outperforms other elastomeric coatings

:: Superior elasticity and elongation
:: Excellent crack bridging properties
:: Waterproofs against wind-driven rain
:: Great dirt pick-up resistance

These are commonly used gloss levels for surfaces listed above. Gloss may be affected by texture, porosity of the surface and atmospheric conditions. Please contact a Dunn-Edwards representative or your local store for specific product availability.

PRODUCTS BEARING THIS LOGO ARE EG-FREE® AND TAC/HAP-FREE

Ethylene Glycol (EG), a solvent often used in water-based paints, is listed as a Toxic Air Contaminant (TAC) and Hazardous Air Pollutant (HAP). In 1983, we were the first in the industry to voluntarily replace EG with Propylene Glycol, a non-toxic alternative “generally regarded as safe” by the FDA. Also, every Dunn-Edwards product with the EG-Free logo is formulated without any other TAC or HAP, too.

VOC AND RAVOC RATINGS ON EVERY LABEL

Dunn-Edwards is the first paint company to label its products with RAVOC ratings — Reactivity-Adjusted VOC Content — a better way to measure potential air quality impacts of coatings. To learn more about RAVOC ratings visit dunnedwards.com/RAVOC.

LEED® GOLD-CERTIFIED PAINT MANUFACTURING FACILITY

In 2011, Dunn-Edwards opened the world’s first and only LEED® Gold-certified paint manufacturing facility in Phoenix, AZ. Encompassing manufacturing, product development, quality control and more, the 336,000-sq. ft. facility is designed to be the greenest in the industry.

“LEED” and related logo are trademarks owned by the U.S. Green Building Council and is used with permission.
Crack Bridging

Hairline cracks are unsightly surface defects that can be found on various exterior masonry surfaces. ENDURALASTIC 10 is a uniquely formulated flexible coating that seals and bridges hairline cracks, which provides excellent waterproofing protection against wind-driven rain.

Chalking/Binder Degradation Resistance

Coatings that exhibit good resistance to weathering such as UV light (sunlight) and moisture will maintain their original appearance longer. ENDURALASTIC 10 clearly beats the Regional and National Brands.
A GREEN LEGACY, A GREENER FUTURE.

Dunn-Edwards has a green legacy that makes us proud and inspires us to do more. We are firmly dedicated to the principle of eco-efficiency, which we define as the ability to satisfy human needs in ways that minimize adverse impacts on energy and material resources, environmental quality, and human health and safety. ENDURALASTIC® is yet another example of this commitment.
